Field of the Invention The present invention relates to a demodulator that demodulates a quadrature amplitude modulation (QAM) modulated signal and a modulation method using the same. 2. Description of the Related Art The demodulation of the modulated wave of the QAM-modulated signal in the prior art is performed by the linearity of the QAM demodulator and the effect of the leakage from the differential oscillator. FIG. 9 is a block diagram of a demodulator that has been proposed (see Non-patent Document 1). A mixer 7 obtains a difference between the output current of the differential oscillator 5 and
